

## The International Advisory Board and the Program Committee comprise the following persons:

Chairman: Jyrki M. Mäkelä (Finland)

## International Advisory Board

Denis Boulaud (France)

Heinz Burtscher (Switzerland)

José L. Castillo (Spain)

Mansoo Choi (Korea)

Ian Colbeck (UK)

Knut Deppert (Śweden)

Heinz Fissan (Germany)

Richard C. Flagan (USA)

Sergey Grinshpun (USÁ)

Gerhard Kasper (Germany)

Athanasios G. Konstandopoulos (Greece)

Y. S. Mayya (India)

Hanns-Rudolf Paur (Germany)

David Y.H. Pui (USA)

Bernd Sachweh (Germany)

Andreas Schmidt-Ott (Netherlands)

Chuen-Jinn Tsai (Taiwan)

Hanna Vehkamäki (Finland)

## Technical Program Committee

Oliver. F. Bischof (Germany)

Jean-Pascal Borra (France)

Miikka Dal Maso (Finland) • Conference Co-chair

Francois Gensdarmes (France)

Kaarle Hämeri (Finland)

Jorma Keskinen (Finland)

Anna Lähde (Finland)

lörg Mayer (Germany)

Lutz Mädler (Germany)

Leon Ntziachristos (Greece)

Topi Rönkkö (Finland) • Conference Co-chair

Dominique Thomas (France)

Hilkka Timonen (Finland)

Jaakko Yli-Ojanperä (Finland)

## Conference Organizers

The Finnish Association for Aerosol Research (FAAR)

Tampere University of Technology

Aerosol Physics Laboratory, Department of Physics

Tampere, Finland

Anna Kuusala, Conference Secretary

Congress Bureau Tavicon Oy Ltd.

Managing Director Karoliina Sunell

Project Manager Leena Sulonen

Project Coordinator Mirja Uotila

www.tavicon.fi

## **PREFACE**

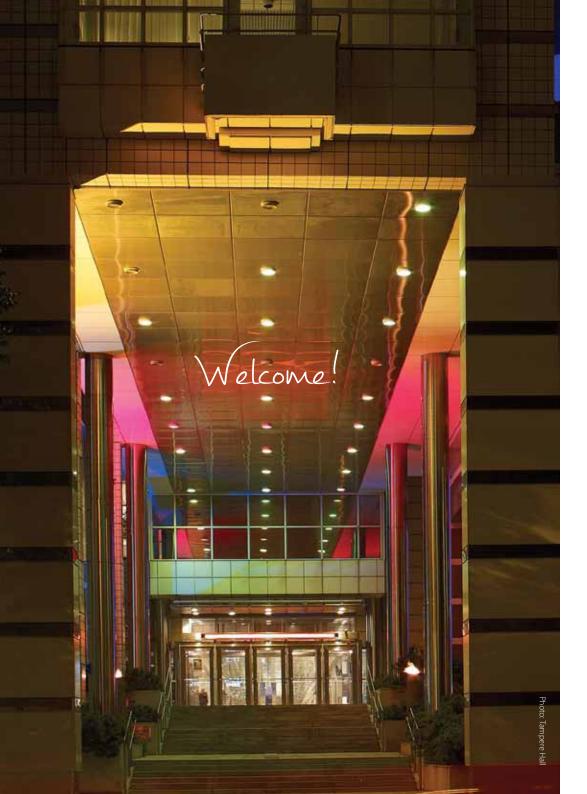

Aerosol Technology 2015 serves the needs of a forum where academic and industrial scientists can collaborate for the benefit of aerosol science and its technologically relevant applications. Aerosol science is widely applied in most common branches of technology, ranging from conventional areas such as emission control, filtration or powder technology to more recent research areas such as functional nanomaterials and coatings or novel instrumentation techniques, including aerosol nano-cluster measurements, approaching to modern mass spectrometry from gas phase.

The conference organized now in Tampere is follow-up of the AT2014 held in Karlsruhe. This year we received ca. 160 abstracts and host roughly 200 attendees. The number of abstracts allows us to arrange three parallel tracks for oral sessions including a special instrument tutorial session as a tool to promote interaction between the aerosol measurement technology and different various application fields.

AT2015 has been organized by Tampere University of Technology (TUT) and Finnish Association for Aerosol Research (FAAR), underneath the umbrella of European Aerosol Assembly (EAA). We sincerely thank these organizations as well as all the sponsors for making the conference happen.

Jyrki M. Mäkelä Conference Chairman

## PLENARY SPEAKERS

Susanne Hering is founder and president of Aerosol Dynamics Inc., a small research firm specializing in the development of measurement methods for fine, airborne particles. Her firm is known for development of the concepts underlying the laminar-flow, water-based condensation particle counter, and for their work in collaboration with the University of California to develop a thermal desorption gas chromatography system for on-line, hourly analysis of organic matter in atmospheric aerosols. Susanne Hering holds a doctorate in the field of low temperature physics from the University of Washington (1974), and entered the field of aerosol research at the California Institute of Technology. She is a past-president of the American Association for Aerosol Research, a founding AAAR Fellow, and a recipient of AAAR's BYH Liu Award. Currently she is an Editor for Aerosol Science and Technology.

Chris Hogan received his Bachelor's Degree from Cornell University in Biological & Environmental Engineering in 2004 and his PhD in Energy, Environmental, and Chemical Engineering from Washington University in Saint Louis in 2008, working under the supervision of Prof Pratim Biswas. From 2008-2009 he was a Postdoctoral Research Associate at Yale University working under the supervision of Prof Juan Fernandez de la Mora. He joined the faculty at the University of Minnesota in the Department of Mechanical Engineering in 2009, where his laboratory group focuses on gas phase chemical physics and aerosol physics, with a specific emphasis on collisional phenomena in aerosols. To date, he has co-authored more than 60 papers in the general area of aerosol science, and is the recipient of the Sheldon K. Friedlander Award from the AAAR in 2011, and a co-recipient of the Smoluchowski award in 2013.

**Einar Kruis** studied chemical engineering at the Technical University Delft, the Netherlands, where he also obtained his Ph.D. degree in 1993 under guidance of Brian Scarlett and Joop Schoonman, also collaborating with Sotiris Pratsinis during a research stay in Cincannati (US) in 1992. He then performed a two-year post-doc period as Marie Curie fellow at the LSGC in Nancy, France. In 1995 he joined the aerosol group of Heinz Fissan in Duisburg (Germany). Currently he is academic director and professor at the nanoaerosol group at the Institute for Technology of Nanostructures at the University of Duisburg-Essen. His research interests are synthesis, handling, measurement technology, applications and population dynamics of nanoparticles, co-authoring over 160 scientific publications. He received the Arnold-Eucken Award and the Smoluchowski Award.

## PROGRAM OVERVIEW

## MONDAY, JUNE 15th 2015

8.00	Registration		
	Small Auditorium		
9.45-10.00	Opening Ceremony Jose L. Castillo President of the European A Assoc. Prof. Miikka Dal Ma	aso	
	Vice President of Finnish Ass Jyrki M. Mäkelä Chairman of the Aerosol Tec	·	arch (FAAR)
	Small Auditorium		
10.00-11.00	Plenary Lecture 1: Beyond Counting - Applic Collection and Charging Prof. Susanne V. Hering, Aero		Systems to Particle
11.00-11.30	Coffee Break & Exhibition	Park Hall	
	Small Auditorium	Studio	Rondo
11.30-13.10	Instrumentation 1: Calibration	Combustion I	Thin films and coatings
13.10-14.00	Lunch Break & Exhibition		
	Small Auditorium	Studio	Rondo
14.00-16.00	Instrumentation 2: Sub 3 nm	Combustion 2	
16.00-16.20	Coffee Break & Exhibition	Park Hall	
	Small Auditorium	Studio	Rondo
16.20-18.20	Filtration	Fundamentals	Instrument Tutorial
18.20	End of Conference Da	y	
19.00-20.30	Welcome Reception b	by The City of Tampe	re

## TUESDAY, JUNE 16th 2015

8.00	Registration		
	Small Auditorium		
8.45-9.45	Plenary Lecture 2: Aggregate Dynamics in the Transition Regime: a two Knudsen Number Problem Prof. Christopher J. Hogan Jr, Univ. Minnesota		
9.45-10.15	Coffee Break & Exhibition	Park Hall	
	Park Hall		
10.15-12.15	Poster session		
10.13-12.13	TOSTEL SESSION		
12.15-13.15	Lunch Break & Exhibition	Park Hall	
		- ·	
	Small Auditorium	Studio	Rondo
13.15-15.15	Instrumentation 3: Charge and surface area	Synthesis I: CVD and generation	Deposition and separation
15.15-15.45	Coffee Break &		
	Exhibition	Park Hall	
		<b>.</b>	
	Small Auditorium	Studio	Rondo
15.45-17.45	Instrumentation 4: Mobility and inertia	Synthesis 2: Flame	Structural analysis
17.45	End of Conference Day	у	
			_
19.30	Conference Dinner	Vapriikki Museum (	Centre

## WEDNESDAY, JUNE 17th 2015

8.30	Registration		
	Small Auditorium		
8.45-9.45	Plenary Lecture 3: Aerosol Nanoparticle Synthesis without Chemical Reactions Prof. Einar Kruis, Univ. Duisburg		actions
9.45-10.15	Coffee Break & Exhibition	Park Hall	
	Small Auditorium	Studio	Rondo
10.15-12.15	Development of new instruments	Detection, analysis and field measurements	buonapart-e
12.15-13.15	Lunch Break & Exhibition	Park Hall	
	Small Auditorium	Studio	Rondo
13.15-15.15	Particle emission and release	Instrumentation 5: Optics and fluorescence	Electrosprays
15.15	Closing Remarks	Small Auditorium	

# PROGRAM

SUNDAY, JUNE 14<sup>th</sup> 2015

17.00-19.00 Registration

18.30-20.30 Ice-breaking Party Tampere Hall (Park Hall)

## PROGRAP

MONDAY, JUNE 15<sup>th</sup> 2015

3.00	Registration	
	Small Auditorium	
9.45	Opening Ceremony Prof. Jose L. Castillo President of the European Aerosol Assembly (EAA) Prof. Jyrki M. Mäkelä Chairman of the Aerosol Technology 2015 Assoc. Prof. Miikka Dal Maso Vice President of Finnish Association for Aerosol Research (FAAR)	
	Small Auditorium	
Chair:	Jorma Keskinen	
10.00-11.00	Plenary Lecture 1: Beyond Counting Applications of Condensation Systems to Particle Collection and Charging Prof. Susanne V. Hering, Aerosol Dynamics Inc.	
11.00-11.30	Coffee Break & Exhibition Park Hall	
11.30-13.10	Small Auditorium	
Instrument	ration I: calibration	
Chairs:	HG. Horn and J.Yli-Ojanperä	
1.30-  1.50   000	<ul> <li>Establishing SI-traceability for the measurement of particle number concentration with condensation particle counters HG. Horn</li> <li>Towards standardized measurements of atmospheric aerosol particle number concentration J. Vanhanen</li> <li>Comparison between two calibration routines of the Single Charged Aerosol Reference (SCAR) K. Pihlava, J. Keskinen, J. Yli-Ojanperä</li> </ul>	
11.50-12.10 <b>0002</b>		
12.10-12.30 <b>0003</b>		
12.30-12.50 <b>0004</b>		
12.50-13.10 Sub-3 nm particle detection with commercial TSI 3772 and Airmodus A20 condensation particle counters J. Kangasluoma, M. Attoui, L. Ahonen, H. Vuollekoski, M. Kulmala and T. Petäjä		

Combustion	n I
Chairs:	L. Pirjola and I. K. Ortega
11.30-11.50	Nitrogen containing exhaust emissions for consideration in
O006	the aerosol research
0006	P. Aakko-Saksa, T. Murtonen, P. Koponen, K. Lehtoranta, P. Roslund,
	· ·
11.50-12.10	P. Karjalainen, T. Rönkkö, H. Timonen, S. Saarikoski, R. Hillamo Transient particulate emissions of a modern diesel passenger car
O007	under real-world driving conditions
3007	H. Wihersaari, P. Karjalainen, L. Pirjola, A. Malinen, J. Keskinen
	and T. Rönkkö
12.10-12.30	Effects of vehicle technology on real exhaust particle emissions from
0008	city buses
0008	L. Pirjola, A. Dittrich, J. V. Niemi, S. Saarikoski, A. Malinen, H. Kuuluvainen,
	H. Wihersaari, H. Timonen, A. Kousa, T. Rönkkö and R. Hillamo
12.30-12.50	Structural and chemical characterization of soot particles
0009	I. K. Ortega, B. Chazallon, Y. Carpentier, C. Irimiea, M. Ziskind, C. Pirim,
0007	F. X. Ouf, D. Delhaye, D. Gaffié, J. Yon, D. Ferry and C. Focsa
12.50-13.10	Suitability of two mini-CAST generators as laboratory surrogate
0010	sources for black carbon mass measurements in the aircraft
0010	engine exhaust
	L. Durdina, P. Lobo, E. Black, M.B. Trueblood, D.E. Hagen, P. Whitefield
	and I. Wang
Back-up	Heavy-duty diesel vehicle particle emissions during engine braking
0011	P. Karjalainen, T. Murtonen, F. Mylläri, H. Wihersaari, J. Keskinen, T. Rönkkö
11.30-13.10	Rondo
Thin films a	and coatings
Chairs:	A.Tricoli and L. Mädler
11.30-11.50	Robust films of graphene nanomaterials created by ultrasonic spraying
O012	L.B. Modesto-López, M. Miettinen, T. Torvela, A. Lähde, and J. Jokiniemi
11.50-12.10	Mesoporous SiO2-coatings on glass by a novel aerosol based coating
0013	method called nFOG
O013	
O013	M. Tuominen, M. Järn, S. Tammela
	M. Tuominen, M. Järn, S. Tammela Aerosol Self-Assembly of Nanoparticle Films: Densification Mechanisms
12.10-12.30 O014	Aerosol Self-Assembly of Nanoparticle Films: Densification Mechanisms of Ultra-Fine Particles in the Diffusion Regime
12.10-12.30	Aerosol Self-Assembly of Nanoparticle Films: Densification Mechanisms of Ultra-Fine Particles in the Diffusion Regime
12.10-12.30	Aerosol Self-Assembly of Nanoparticle Films: Densification Mechanisms
12.10-12.30 <b>0014</b>	Aerosol Self-Assembly of Nanoparticle Films: Densification Mechanisms of Ultra-Fine Particles in the Diffusion Regime N. Nasiri, T. D. Elmøe, Q. Qin, Y. Liu, A. Tricoli
12.10-12.30 <b>0014</b> 12.30-12.50	Aerosol Self-Assembly of Nanoparticle Films: Densification Mechanisms of Ultra-Fine Particles in the Diffusion Regime N. Nasiri, T. D. Elmøe, Q. Qin, Y. Liu, A. Tricoli High-speed fabrication of superhydrophobic nanocoating by Liquid
12.10-12.30 <b>0014</b> 12.30-12.50	Aerosol Self-Assembly of Nanoparticle Films: Densification Mechanisms of Ultra-Fine Particles in the Diffusion Regime N. Nasiri, T. D. Elmøe, Q. Qin, Y. Liu, A. Tricoli High-speed fabrication of superhydrophobic nanocoating by Liquid Flame Spray J. Haapanen, M. Aromaa, H. Teisala, M. Tuominen, M. Sillanpää, M. Stepien, J.J. Saarinen, M. Toivakka, J. Kuusipalo and J.M. Mäkelä
12.10-12.30 <b>0014</b> 12.30-12.50	Aerosol Self-Assembly of Nanoparticle Films: Densification Mechanisms of Ultra-Fine Particles in the Diffusion Regime N. Nasiri, T. D. Elmøe, Q. Qin, Y. Liu, A. Tricoli High-speed fabrication of superhydrophobic nanocoating by Liquid Flame Spray J. Haapanen, M. Aromaa, H. Teisala, M. Tuominen, M. Sillanpää,

Toivakka, J. Kuusipalo and J.M. Mäkelä Thermophoretic thin film deposition of self-assembled carbon nanotubes J.L. de La Verpilliere and A.M. Boies

14.00-16.00	Small Auditorium
Instrument	ation 2: Sub 3 nm
Chairs:	M. Attoui and A. Schmidt-Ott
14.00-14.20	Control of Condensation onto 1/2 nm particles in Laminar Growth
0018	Tubes via Lewis Number Modulation in He/CO2 Gas Mixtures
	J. M. Thomas, A. Maisser, C. J. Hogan
14.20-14.40	Aerosol precursor and cluster mass spectrometry: Recent advances and
O019	future research directions
	M. Sipilä and M. Ehn
14.40-15.00	Mobility calibration standards in air in the 20-80 C temperature range
O020	M. Attoui, J. Fernández-García, J. Fernandez de la Mora
15.00-15.20	Calibrating an instrument measuring 1-3 nm aerosol paricle number
O021	size distribution
	J. Vanhanen, J. Kangasluoma, M. Attoui, M. Väkevä
15.20-15.40	Generation, characterization and sizing of neutral sub 3 nm metallic
O022	clusters
	J. Kangasluoma, M. Attoui, H. Junninen, K. Lehtipalo, A. Samodurov,
	F. Korhonen, N. Sarnela, A. Schmidt-Ott, D. Worsnop, M. Kulmala, T. Petäjä
15.40-16.00	Increasing the sampling efficiency of sub-3 nm particles measurements
O023	using the "sampling box"
	A. Franchin, J. Duplissy, J. Kangasluoma, F. Korhonen, T. Petäjä
14.00-16.00	Studio
Combustio	
Chairs:	T. Rönkkö and A. Bologa
14.00-14.20	Characteristics and formation of natural gas engine exhaust nanoparticles
O024	J. Alanen, E. Saukko, K. Lehtoranta, H. Timonen, J. Keskinen, T. Rönkkö
14.20-14.40	Volatility of wood-burning SOA precursors: a chance for mitigating
O025	SOA production
1440 1500	A. Keller, J. C. Corbin, A. A. Mensah, B. Sierau, H. Burtscher
14.40-15.00	Online characterization of wood combustion emissions and their
O026	atmospheric aging
	O. Sippula, P.Tiitta, M. Kortelainen, P.Yli-Pirilä, H. Czech, C. Radischat,
	J. Tissari, A. Leskinen, A. Hartikainen, H. Koponen, J. Leskinen, T. Torvela,
	M. Ihalainen, H. Lamberg, J. Grigonyte, L. Hao, T. Streibel, J. Orasche,
15.00 15.20	A. Virtanen, K. Lehtinen, R. Zimmerman, J. Jokiniemi
15.00-15.20	Aerosol of silica nanoparticles generated during the combustion of
O027	a polysiloxane nanocomposite
	G. Ounoughene, O. Le Bihan, C. Chivas-Joly, C. Longuet, C. Motzkus,
15.20-15.40	B. Debray, A. Joubert, J-M. Lopez-Cuesta, L. Le Coq
	Influence of particle concentration in the exhaust gas from wood
O028	combustion boiler on their charging and precipitation
15.40-16.00	A. Bologa, M. Ecker, HP. Rheinheimer, HR. Paur  Portable emission measurement system (PEMS) for tailpipe and exhaust
O086	plume aerosols
0000	piume aerosois   A. Järvinen, A. Rostedt, H. Wihersaari, M. Olin, J. Yli-Ojanperä, T. Rönkkö,
	A. Jarvinen, A. Rosteat, H. winersaari, M. Olin, J. 11-Ojanpera, I. Ronkko,   J. Keskinen
	J. NESMITELL
16.00-16.20	Coffee Break & Exhibition Park Hall

16.20-18.20	Small Auditorium
Filtration	
Chairs:	G. Kasper and N. Bardin-Monnier
16.20-16.40	Numerical prediction of single fibre efficiency for nanoparticles filtration
O030	N. Bardin-Monnier, A. Charvet, D. Thomas
16.40-17.00	Characterization of an Open-Pored Nickel Foam with Respect to
O031	Aerosol Filtration Efficiency
	A. Hellmann, M. Pitz, K. Schmidt, F. Haller, S. Ripperger, S. Antonyuk
17.00-17.20	Impact of the Filtration Velocity on the Pressure Drop and Internal
O032	Liquid Transport of Fibrous Oil Mist Filters
0002	H. E. Kolb, S. Wurster, J. Meyer, G. Kasper
17.20-17.40	Effect of mesoscale inhomogenity on fibrous filter performance
O033	- CFD investigation
0000	A. Moskal, L. Makowski
17.40-18.00	Optimization of ultrafine particles filtration in granular beds
0034	L. Wingert, D. Bémer, S. Pacault, A. Charvet, N. Bardin-Monnier, D. Thomas
18.00-18.20	On site air filter test system
O035	I. Kulmala, T. Kalliohaka, A. Taipale and H. Salmela
Back-up	Drop fragments generated by bursting air bubbles on oil mist filters
O036	S. Wurster, J. Meyer, G. Kasper
0030	J. Warster, J. Meyer, G. Nasper
16.20-18.20	Studio
Fundament	als
Chairs:	H.Vehkamäki and I. Ford
16.20-16.40	Role of lattice mismatch in heterogeneous nucleation of ice
O037	O. H. Pakarinen, H. Vehkamäki
16.40-17.00	Molecular Dynamics Simulation on Aerosol Formation of Water
O038	D. Suh, K. Yasuoka
17.00-17.20	Hydration and mobility of bisulfate ion-sulfuric acid-ammonia/dimethyl
O039	amine clusters from computational studies
	N.T.Tsona, H. Henschel, N. Bork, H. Vehkamäki
17.20-17.40	Nucleation barrier for complex materials determined by guided
O040	molecular dynamics
	I. Ford
17.40-18.00	Types of Aerosol Formed by Condensation
0041	C. Clement
18.00-18.20	Formation of particles by radiolytical oxidation of organic iodine
	i orinadori or particico dy radiorytical oxidation or organic Iddine

T. Kärkelä, A. Auvinen, T. Kekki, P. Kotiluoto, J. Lyyränen, J. K. Jokiniemi

Surface properties for atmospheric surfactant aqueous solutions and

their variation with environmental parameters observed directly with synchrotron XPS N.L. Prisle, G. Öhrwall, J. Werner, V. Ekholm, M.-M. Walz, and O. Björneholm

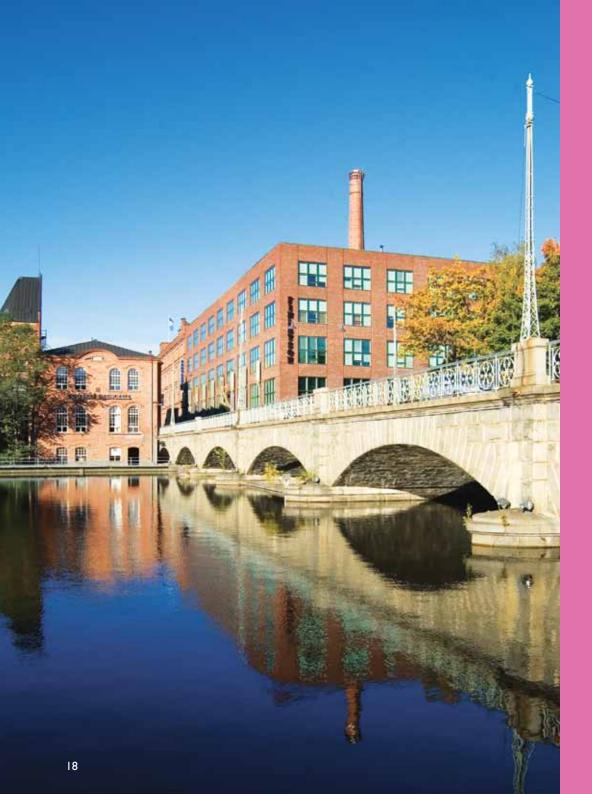

## 16.20-18.20 Rondo Instrument tutorial

O042

Back-up O043

## 18.20 End of Conference Day

## 19.00-20.30 Welcome Reception by The City of Tampere

# PROGRAM

TUESDAY, JUNE 16<sup>th</sup> 2015

8.00	Registration
	Small Auditorium
Chair:	Kaarle Hämeri
8.45-9.45	Plenary Lecture 2: Aggregate Dynamics in the Transition Regime: a two Knudsen Number Problem Prof. Christopher J. Hogan Jr, Univ. Minnesota
9.45-10.15	Coffee Break & Exhibition Park Hall
	Park Hall
10.15-12.15	Poster session

## **POSTERS**

## SYNTHESIS AND GENERATION

ΡI	Electrospray Deposition Method for TEM sample preparation P. Dohányosová, P. Ballorca, I. G. Loscertales and S. Lopéz-Vidal	
P2	Bimetallic platinum-palladium nanocatalysts produced by spark discharge K. Hu, M.E.J. Stettler, S.A. Scott and A.M. Boies	
P3	Hydrogen assisted spark discharge generation of metal particles R.T. Hallberg, K.D.Thelander, M. Magnusson, M. Messing	
P4	Role of Sulphur and Carbon Precursors on Catalyst Nanoparticle Growth and CNT Formation in a Continuous Gas Phase Process C. Hoecker, F. Smail, M. Pick and , A.M. Boies	
P5	On the correlation of spectral emission and nanoparticle yield in a spark discharge generator  A. Kohut, G. Galbács, L. Ludvigsson, B.O. Meuller, M.E. Messing, K. Deppert, and Zs. Geretovszky	
P6	Chitosan nanoparticle generation and characterization using CARS technique G. Mordas, V. Ulevicius, V. Dudoitis and A. Dementjev	
 P7	Controlled Particle Synthesis in a Hot-Wall Reactor and Manipulation of the Aggregation Process D. B. Rasche, L. Knobel and HJ. Schmid	
 P8	Optimization of silver particle number size distributions from a nucleation furnace by modification of heat shields and injection nozzles J. Rosahl, A. Nowak, A. Kuntze, M. Hildebrandt, IC. Masthoff, G. Garnweitner and V. Ebert	
 P9	Liquid Flame Spray synthesis of TiO2/CeO2 nanoparticles M. Sorvali, J. Haapanen and J.M. Mäkelä	
PI0	Aerosol synthesis, generation, and characterization for toxicological studies  A.I. Koivisto, E.M. Rydman, H. Alenius, H. Norppa, K.M. Savolainen and K.J. Hämeri	

## **INSTRUMENTATION & CHARGE**

PII	Comparability and accuracy of personal nanoparticle exposure monitors C. Asbach, H. Kaminski, B. Stahlmecke, C. Monz, D. Dahmann, M. Fierz, S. Clavaguera, B. Faure, N. Dziurowitz, A. Meyer-Plath, B. Dettlaff, A. S. Godinho de Fonseca, M. Viana, A. M. Todea		
PI2	Similar DMA aerosol size measurements with Krypton and post-DBD neutralizers R. Mathon, N. Jidenko and JP. Borra		
PI3	Charge distribution of particles with dense and fractal structure L. Hillemann, M. Seipenbusch, M. Stintz		
PI4	EUSAAR extended range mobility particle size spectrometer F. Korhonen, P.P. Aalto, E. Siivola, H. Manninen and T. Petäjä		
PI5	Portable ice nuclei counter SPIN: Key specifications, principle of operation and the first experiments K.Korhonen, A.Virtanen and M.Komppula		
PI6	Verification of particle mass classification using the centrifugal particle mass analyser at small particle sizes J.S Olfert, J.P.R. Symonds		
PI7	Particle Number Portable Emission Measurement System T. Reinisch, A. Bergmann, Georg Brunnhofer, Athanasios Mamakos, Martin Fierz		
PI8	Application of a Particle Size Magnifier under high relative humidity conditions D. Wimmer, J. Kangasluoma, K. Lehtipalo, J. Vanhanen, A. Franchin, J. Backmann, T. Petäjä, M. Kulmala		
PI9	Cyclone separator sampler for combustion aerosol: modelling and laboratory experiments F. Mylläri, A. Karvinen, P. Karjalainen, J. Maunula, P. Janhunen, H. Ahlstedt, J. Keskinen and T. Rönkkö		

## AEROSOL FUNDAMENTALS & CHEMISTRY

P21	Simulation of a condensing aerosol in homogeneous isotropic turbulence A. Alshaarawi, A. Attili, and F. Bisetti		
P22	Detection of highly condensable aerosol precursors from oxidation of aromatic compounds O. Garmash, M. P. Rissanen, O. Kausiala, M. Kulmala, M. Sipilä and M. Ehn		
P23	A simulation-based method for determining collision and evaporation rates from measured cluster distributions O. Kupiainen-Määttä, H. Vehkamäki		
P24	Extending the first nucleation theorem into real environments J. Malila, R. McGraw, A. Laaksonen, and K. E. J. Lehtinen		
P25	Surface properties for atmospheric surfactant aqueous solutions and their variation with environmental parameters observed directly with synchrotron XPS  N.L. Prisle, G. Öhrwall, J. Werner, V. Ekholm, MM. Walz, and O. Björneholm		
P26	An experimental and theoretical assessment of the dissociation of ammonium nitrate aerosol N. Talbot, V. Zdimal, J. Ondracek, J. Schwarz		
P27	Monitoring the transport behaviour of toluene through protective polymer gloves using quartz crystal microbalance M.J. Chen, L.H. Cheng and T.P. Tseng		

## COMBUSTION

## P28 Design and characterisation of a probe for particle sampling in boilers of waste incineration plants

S. Schumacher, J. Lindermann, B. Stahlmecke, T. Zeiner, T. van der Zwaag, H. Nordsieck, R. Warnecke, C. Asbach

## P29 The MERMOSE project: Characterization of particulates emissions of a commercial aircraft engine

D. Delhaye, F.-X. Ouf, D. Ferry, C. Guin, S. Peillon, F. Salm, A. Crespin, I. Marhaba, D. Gaffie, O. Penanhoat, X. Vancassel, J.-J. Lecout, A. Vandestoc, E. Landais, C. Focsa, I.K. Ortega, J. Burguburu

## P30 Differential mobility analysis of soot nuclei in a laminar C2H4/air premixed flame

F. Carbone. M. Attoui and A. Gomez

## P31 Transformation of diesel vehicle exhaust, pellet boiler exhaust, and their mixture in an environmental chamber

A.Leskinen, P.Yli-Pirilä, L. Hao, J. Kim, T.Torvela, E. Asmi, D. Brus, J. Grigonyte, A. Jaatinen, E. Kari, A. Kortelainen, K. Kuuspalo, H. Lamberg, J. Leskinen, U. Makkonen, P. Miettinen, I. Nuutinen, T. Raatikainen, O. Sippula, H. Hakola, J. Jokiniemi, A. Virtanen, M. Komppula, K.E.J. Lehtinen

## P32 Effective density measurements of aircraft soot particles and surrogates F.X. Ouf, A. Bescond, D. Ferry, I. Marhaba, F. Salm, S. Peillon, J. Yon, D. Delhaye, D. Gaffie, C. Guin, J.J. Lecout, L. Ait-Ali-Yahia, A. Forthomme, B. Sagot, and A. Vandestoc

P33 Heavy-duty diesel vehicle particle emissions during engine braking P. Karjalainen, T. Murtonen, F. Mylläri, H. Wihersaari, J. Keskinen and T. Rönkkö

## AEROSOL MEASUREMENTS: OUTDOOR-INDOOR-WORKPLACE

- P34 ACTRIS WP3: Improving the observations of the in-situ aerosol properties in Europe
  - P.P. Aalto, H. Manninen, T. Petäjä and A. Wiedensohler
- P35 Characterization, Fate, and Re-suspension of Aerosol Particles (0.3–10 μm) inside University Offices: the Effects of Occupancy and Carpet T. Hussein, L. Dada, H. Juwhari, D. Faouri
- P36 Urban air quality measurements in Beijing, China, using a PPS-M sensor M. Dal Maso, J. Gao, A. Järvinen , and T. Rönkkö
- P37 A Study on carbonaceous particles over northern India: Simplifying the method of calculation of fractal dimension

  S. Gautam
- P38 Characteristics of emission and size fractions of fine particles (PM10, PM2.5) from stationary sources using cyclone (US EPA Method 201A) and cascade impactors

  S.H. Han, H.R. Kim, K.W. Jang, D.I. Kang, K.J. Jeon and Y.W. Jung
- P39 Characterization of nanoparticles at different workplaces
  M. Miettinen, I. Leskinen, T. Torvela, A. Lähde, larkko Tissari and I. lokiniemi
- P40 Investigating the potential for secondary aerosol formation in rural area of Central Chile

S. Saarikoski, F. Reyes, Y. Vázquez, M. Tagle, M. Aurela, H. Timonen, W.H. Brune, D. Worsnop, P. Oyola and R. Hillamo

P41 Relationship of Gas Precursors and Water-soluble Ionic Species in Airborne Particulate Matter in Southern Taiwan

Jiun-Horng Tsai, Li-Peng Chang

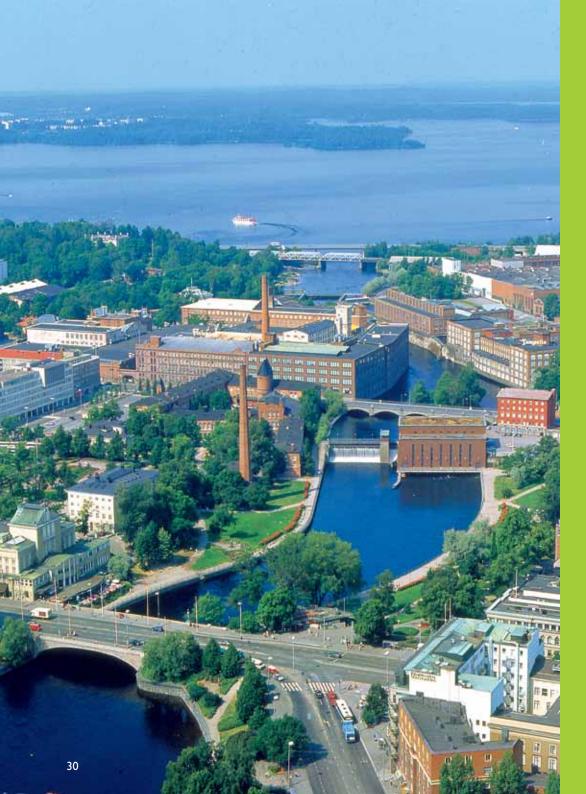

## FILTRATION & BIOAEROSOLS & RESPIRATORY AEROSOLS

P42	Calculation of deposition on fibrous filters as a function of time S. J. Dunnett and C. F. Clement	
P43	Consecutive droplets-solid particles and solid particles-droplets filtration in fibrous filters  J.M. Gac and A. Jackiewicz	
P44	Filtration of gaseous and particulate iodine with a wet electrostatic precipitator M. Gouëllo, T. Kärkelä, J. Hokkinen, A. Auvinen, P. Rantanen	
P45	Effect of material properties on filtration efficiency and deposits structure in fibrous filters R. Przekop, A. Jackiewicz, M. Woźnak, L. Gradoń	
P46	Effect of humidity on the pressure drop of nanostructured deposit Q. Ribeyre, A. Charvet, C. Vallières and D. Thomas	
P47	Set-up for Bioaerosol Exposure on Photocatalytic Surfaces M. Luhtalampi, J. Haapanen, S. Mustalahti, T. Humppi, and J.M. Mäkelä	
P48	Inactivation of microorganisms on filter elements of Tion A air cleaners A.S. Safatov, O.V. Pyankov, V.A. Vechkanov, V.V. Solodkii, G.A. Buryak and D.A. Trubitsyn	
P49	The Effect of Inhaled Submicron Particles of a Nanocomposite Preparation in Mice with the Acute Respiratory Distress Syndrome V.A. Vechkanov, A.S. Safatov, L.N. Shishkina, S.L. Vedenchuk, E.I. Vereshchagin, A.V. Dushkin, L.P. Suntsova, N.A. Zhukova, T.G. Tolstikova	
P50	CARS microscopy as a tool to characterize bioaerosol V. Ulevicius, G. Mordas and A. Dementjev	
P5 I	Drop fragments generated by bursting air bubbles on oil mist filters S. Wurster, J. Meyer and G. Kasper	
P52	Small biomass boiler particle removal system A. Laitinen, K. Janka and J. Keskinen	

12.15-13.15	Lunch Break & Exhibition Park Hall
13 15-15 15	Small Auditorium
	ation 3: Charge and surface area
Chairs:	T.Tritscher and D. Meier
13.15-13.35	Advanced Electrospray Aerosol Generator with Integrated Soft
O044	X-ray Neutralizer
3011	T.Tritscher, A. Avenido, A. F. Zerrath, T. Johnson, J. H.T. Scheckman,
	T. Krinke, F. Dahlkötter and O. F. Bischof
13.35-13.55	Bipolar Charge Analyzer (BOLAR): A new device for bipolar charge
O045	measurements
	J.Yli-Ojanperä, A. Ukkonen, A. Järvinen, S. Layzell, V. Niemelä, J. Keskinen
13.55-14.15	Study of corona discharge in high pressure helium under various
O046	temperature conditions
	A. Bologa, K. Woletz, HR. Paur
14.15-14.35	Miniature electrical nanoparticle detector for simultaneous measure
O047	ment of particle number, average size and lung-deposited surface area
1435 1455	D. Meier, D. Egli, P. Steigmeier, H. Burtscher, M. Fierz
14.35-14.55	Lung deposited surface area size distributions in different urban areas
O048	H. Kuuluvainen, A. Järvinen, L. Pirjola, J. V. Niemi, R. Hillamo, J. Keskinen, T. Rönkkö
14.55-15.15	Measuring Number, Mass and Size of Diesel Exhaust Particles with
O049	the Dual Pegasor Particle Sensor
0017	S. Amanatidis, L. Ntziachristos, M. M. Maricq, Z. Samaras, I. Tikkanen
	on what a day is the later holds, the holds of the holds
13.15-15.15	Studio
Synthesis I:	CVD and generation
Chairs:	M. Miettinen and J. Harra
13.15-13.35	Structural analysis of a new multi-layer graphene-carbon nanoflower
O050	composite
	M. Miettinen, T. Torvela, C. Pfüller, J. Hokkinen, M. Ramsteiner,
12.25 12.55	L. Modesto-Lopez, J. Jokiniemi, A. Lähde Particle based Functional Materials from the Gas Phase
13.35-13.55	
O051 13.55-14.15	M. Seipenbusch Nanostructured materials for efficient and inexpensive NO2 sensing
O052	using spark discharge generator
0032	N.A. Isaac, M. Valenti, A. Schmidt-Ott, G. Biskos
14.15-14.35	Titania-silver composite nanoparticles with interesting morphology
O053	J. Harra, P. Juuti, J. Haapanen, M. Sorvali, J. M. Mäkelä
14.35-14.55	Homogeneous coating of aerosol nano particles in a cold plasma
O054	at atmospheric pressure
	P. Post, S. Dahle, W. Maus-Friedrichs and A.P. Weber
14.55-15.15	On-chip microacoustic aerosol generation
O055	A. Winkler, S. Harazim, S. Menzel, H. Schmidt

Deposition	AND SEDAFATION
Chairs:	F. Gensdarmes and F. Haller
13.15-13.35	Particle depletion in an enclosure with turbulent natural convection
O056	J. Kalilainen, A. Dehbi, T. Lind, A. Auvinen
13.35-13.55	Dose determination in the Air-liquid interface exposure of cell
O057	cultures for in vitro toxicological studies
	S. Mülhopt, T. Krebs, HR. Paur
13.55-14.15	Studies of particle monolayer deposits re-suspension at low pressure
O058	in a wind-tunnel
	A. Rondeau, A. Roynette, JC. Sabroux, F. Gensdarmes, E. Chassefière
14.15-14.35	Study on nanoparticle scavenging and filter cakes in a waste
O059	incineration plant
	T.Thajudeen, H. Förster, C. Funk, W. Peukert
14.35-14.55	Lift off and dispersion of fractal-like aggregates
O060	Ł. Żywczyk, A. Moskal, R. Przekop
14.55-15.15	Experimental study and modelling of droplet growth and activation
O061	efficiency for efficient aerosol separation by heterogeneous
	condensation
	F. Haller, B. Daumann, M. Pitz, A. Hellmann, K. Schaber, S. Antonyuk,
	S. Ripperger
Back-up	Small biomass boiler particle removal system
O062	A. Laitinen, K. Janka, J. Keskinen
15.15-15.45	Coffee Break & Exhibition Park Hall
15.45-17.45	Coffee Break & Exhibition Park Hall Small Auditorium
5.45-  7.45   Instrument	Coffee Break & Exhibition Park Hall
15.45-17.45 Instrument Chairs:	Coffee Break & Exhibition Park Hall Small Auditorium ation 4: Mobility and inertia
15.45-17.45 Instrument Chairs: 15.45-16.05	Coffee Break & Exhibition Park Hall Small Auditorium ation 4: Mobility and inertia J. S. Olfert and M. Moisio
15.45-17.45 Instrument Chairs: 15.45-16.05 0063	Coffee Break & Exhibition Park Hall  Small Auditorium  tation 4: Mobility and inertia  J. S. Olfert and M. Moisio  A true monodisperse classifier without charge-state artefacts:  Classifying nanoparticles with the Aerodynamic Aerosol Classifier  J. S. Olfert, C. Lowndes, J.P.R. Symonds, K StJ. Reavell, M. Rushton
15.45-17.45 Instrument Chairs: 15.45-16.05 0063	Coffee Break & Exhibition Park Hall  Small Auditorium  tation 4: Mobility and inertia  J. S. Olfert and M. Moisio  A true monodisperse classifier without charge-state artefacts:  Classifying nanoparticles with the Aerodynamic Aerosol Classifier  J. S. Olfert, C. Lowndes, J.P.R. Symonds, K StJ. Reavell, M. Rushton  Correction method for SMPS measured particle size distributions
15.45-17.45 Instrument Chairs: 15.45-16.05 0063 16.05-16.25	Coffee Break & Exhibition Park Hall  Small Auditorium  ation 4: Mobility and inertia  J. S. Olfert and M. Moisio  A true monodisperse classifier without charge-state artefacts: Classifying nanoparticles with the Aerodynamic Aerosol Classifier  J. S. Olfert, C. Lowndes, J.P.R. Symonds, K StJ. Reavell, M. Rushton  Correction method for SMPS measured particle size distributions with high number concentrations at the upper size limit
15.45-17.45 Instrument Chairs: 15.45-16.05 0063 16.05-16.25	Coffee Break & Exhibition Park Hall  Small Auditorium  tation 4: Mobility and inertia  J. S. Olfert and M. Moisio  A true monodisperse classifier without charge-state artefacts: Classifying nanoparticles with the Aerodynamic Aerosol Classifier J. S. Olfert, C. Lowndes, J.P.R. Symonds, K StJ. Reavell, M. Rushton  Correction method for SMPS measured particle size distributions with high number concentrations at the upper size limit H. Kaminski, B. Stahlmecke, C. Asbach, T.A.J. Kuhlbusch
15.45-17.45 Instrument Chairs: 15.45-16.05 0063 16.05-16.25 0064	Coffee Break & Exhibition Park Hall  Small Auditorium  ation 4: Mobility and inertia  J. S. Olfert and M. Moisio  A true monodisperse classifier without charge-state artefacts: Classifying nanoparticles with the Aerodynamic Aerosol Classifier  J. S. Olfert, C. Lowndes, J.P.R. Symonds, K StJ. Reavell, M. Rushton  Correction method for SMPS measured particle size distributions with high number concentrations at the upper size limit  H. Kaminski, B. Stahlmecke, C. Asbach, T.A.J. Kuhlbusch  High-resolution low-pressure cascade impactor
15.45-17.45 Instrument Chairs: 15.45-16.05 0063 16.05-16.25 0064	Coffee Break & Exhibition Park Hall  Small Auditorium  tation 4: Mobility and inertia  J. S. Olfert and M. Moisio  A true monodisperse classifier without charge-state artefacts: Classifying nanoparticles with the Aerodynamic Aerosol Classifier  J. S. Olfert, C. Lowndes, J.P.R. Symonds, K StJ. Reavell, M. ## PROGRAZ

WEDNESDAY, JUNE 17<sup>th</sup> 2015

8.30	Registration
	Small Auditorium
Chair:	Jorma Jokiniemi
8.45-9.45	Plenary Lecture 3:
	Aerosol Nanoparticle Synthesis without Chemical Reactions
	Prof. Einar Kruis, Univ. Duisburg
9.45-10.15	Coffee Break & Exhibition Park Hall
10.15-12.15	Small Auditorium
Developme	nt of new instruments
Chairs:	I. Duplissy and M. Dal Maso
10.15-10.35	Towards a Portable NanoParticle Sizing System
O080	G. Lewis, S. Spielman, S. V. Hering, W. Mui, R. C. Flagan
10.35-10.55	Scanning Supersaturation CPC applied as a nano-CCN counter for
O081	size-resolved analysis of the hygroscopicity and chemical composition
	of nanoparticles
	Z.B. Wang, H. Su, X. Wang, N. Ma, A. Wiedensohler, U. Pöschl, Y. Cheng
10.55-11.15	A transportable Ice Nucleation Chamber for field measurement
O082	J. Duplissy, Q. Nguyen, E. S. Thomson, V. Hemmilä, M. Kulmala, T. Petäjä,
	M. Sipilä, M. Bilde, E. Swietlicki, Z.A. Kanji
11.15-11.35	Saturation vapour pressures from evaporation rates of organic aerosol
O083	particles
	E. Emanuelsson, M. Tschiskale, M. Bilde
11.35-11.55	Development of a technology for online measurement of total and
O084	water-soluble copper (Cu) in ambient PM
	D. Wang, M. M. Shafer, J. J. Schauer, C. Sioutas
11.55-12.15	A mobile measurement unit to measure road traffic emissions and
O085	air quality
	M. Dal Maso, H. Wihersaari, T. Rönkkö

10.15-12.15	
10.15-12.15 Studio	
Detection, analysis and field measurements	
Chairs:	H. E. Manninen and H. Timonen
10.15-10.35 <b>0087</b>	First measurements of the number size distribution of I – 2 nm particles released from manufacturing processes in a cleanroom environment L. R. Ahonen, J. Kangasluoma, J. Lammi, K. Lehtipalo, T. Petäjä and M. Kulmala
10.35-10.55 <b>0088</b>	Patterns of airborne pollen and fungal spore concentrations and their mass fraction in Hyytiälä, Finland H. E. Manninen, SL. Sihto-Nissilä, J.A. Huffman, J. Bäck, AM. Pessi, V. Hiltunen, P. P. Aalto, P. J. Hidalgo, P. Hari, A. Saarto, M. Kulmala, and T. Petäjä
10.55-11.15 <b>0089</b>	Cessna 172 light aircrafts as a platform for measuring aerosols in the lower troposphere R. Väänänen, R. Krejci, H. E. Manninen, J. Kangasluoma, T. Nieminen, S. Mazon, J. Lampilahti, S. Schobesberger, A. Manninen, L. Ahonen, L. Zhou, T. Yli-Juuti, T. Pohja, P. P. Aalto, T. Petäjä, M. Kulmala
11.15-11.35 <b>0090</b>	Effects of spatial sensitivity on particle detection with microfabricated electro-acoustic resonators  A.T. Zielinski, A. Prasad, A.A. Seshia, M. Kalberer and R.L. Jones
11.35-11.55 <b>0091</b>	Measurements of aerosol composition at coastal site in Antarctica using Time-of-Flight Aerosol Chemical Speciation (ToF-ACSM) monitor H.Timonen, M.Aurela, D. Brus, H. Lihavainen, R. Hillamo, M. Cubison, B. Nekat, R. Weller, D. Worsnop, E. Asmi

14.35-14.55	Generation of neutral calibration clusters
O113	G. Steiner, A. Franchi, J. Kangasluoma, M. Rissanen, T. Petäjä, M. Kulmala
14.55-15.15	Generation of Water Soluble Standards lons in the sub 2 nm range
0114	M. Attoui
15.15	Closing Remarks Small Auditorium

## **SOCIAL PROGRAM**

## **SUNDAY JUNE 14th**

Ice-breaking Party and Opening of the Exhibition

Place: Tampere Hall, Park Hall at 18.30 - 20.30

Included in the registration fee for delegates and exhibitors, prior booking is required.

This informal get-together and opening of the exhibition takes place at the conference venue, Tampere Hall. A Buffet with wine will be served. Welcome to enjoy good company of your colleagues and make new friends in a relaxed atmosphere!

## **MONDAY JUNE 15th**

Welcome Reception by the City of Tampere

Place: the Old City Hall at the Central Square, address: Keskustori 10 at 19.00-20.30, invitation needed

The City of Tampere cordially invites us for cocktails at the Old City Hall, located at the Central Square, in the midst of Tampere. This neo-renaissance building from the year 1890 is a real beauty itself – but moreover the numerous paintings and works of art that decorate the halls will delight you. It provides the ideal setting for this official welcome.

After the reception you will easily find a nice restaurant in the city centre for dinner or continue the evening in one of the various bars or clubs of Tampere.

## **TUESDAY JUNE 16th**

Conference Dinner

Place: Vapriikki Museum Centre, address: Alaverstaanraitti 5 at 19.30–23.00, possibility to visit the museum exhibitions at 18.00–19.30 Fee: EUR 55 delegates, Students EUR 30, prior booking required; a green dot on your badge is your entrance ticket to the Museum and Dinner.

The Conference Dinner is held in the Museum Centre Vapriikki, the old engineering works of Tampella Ltd on the banks of the Tammerkoski Rapids. In the 1990's the factory was converted into a museum centre hosting several exhibitions. Inside, you can still sense the feeling of the past...

A buffet Dinner with wine will be served. Music entertainment by "TUT Prof Experience".

## Before the Dinner, you have the possibility to visit two Museum Exhibitions:

The Tammerkoski Rapids and the Story of Tampere, and Innovations. The Tammerkoski Rapids exhibition tells the story of how a small village grew into an industrial city; Innovations is an exhibition and research project focusing on the past and present of local technical know-how.

The Museum Centre is located within a short walking distance from the conference venue and the hotels. Student assistants will walk you from hotels to the Dinner venue (note: not from Scandic Hotels). Meeting in the hotel lobby at 19.00. You can also walk there on your own. On the map on the next page you will find the venue.

## SCIENTIFIC INFORMATION

Abstracts All abstracts will be published on the conference website www.tut.fi/at2015

**Posters** are displayed in the poster area in Park Hall.

**Poster Session:** Tuesday 16th June at 10:15–12:15. Presenting authors are asked to attend their poster during the poster session.

Posters are to be mounted on Monday morning and left on display till Wednesday afternoon. Please remove your poster by this time.

### Instructions for Oral Presentations

Oral presenters are requested to report to the session chair at least 10 minutes prior to the start of their session. Speakers may use either the PC installed in the meeting room or their own computer.

**Speakers' service desk** is located in the main lobby. Speakers are asked to bring their slides/PowerPoint presentations at the speakers' service desk at least 3-4 hours before the time of their presentation; preferably the day before.

When you intend to use your own PC in the meeting room, please check the technique during the break before your session. Technical support is provided by the conference staff in each meeting room.

Please note that the presentation time is 20 minutes in total, i.e. 15 minutes for the talk and 5 min for discussion.

### **Instructions for Back-up Presentations**

Back-up presentations are poster presentations that will also be offered a slot for oral presentation if a vacancy becomes available. Presenters should check with chairs at the start of relevant oral session.

## GENERAL INFORMATION

### Conference venue

Tampere Hall (address: Yliopistonkatu 55), tel. +358 3 2434 111.

**Registration and service desk** is in the main entrance hall of the Tampere Hall. The desk is open on Sunday at 17.00–19.00, Monday 8.00–18.30, Tuesday 8.00–18.00, Wednesday 8.30–15.30. The personnel will be happy to help you, if you have questions concerning, for example, registration & payment, hotel bookings and social events. Registration desk's international telephone number is +358 40 770 5035.

## Registration fee includes:

- Scientific program
- Lunch and refreshments Mon-Wed
- Ice-breaking party on Sun 14 June
- Welcome Reception by the City of Tampere on Mon 15 June
- Conference material and name badge
- Admission to all scientific sessions
- Admission to the exhibition

**Badges and Tickets** Please wear your name badge at all times; it is your entrance ticket to all sessions, lunches, coffees and exhibition area. No badge, no entry! If you have lost your badge or left it at your hotel, please contact the registration desk.

**Assistants** Voluntary conference assistants (students) will be happy to help you with practical matters. They will assist the speakers and chairpersons in the lecture rooms and will be at your service at the registration desk, too. The assistants can easily be recognized from the "All Bright Tampere" T-shirts.

**Coffee breaks** Coffee/tea is included in the conference fee for conference participants twice a day at times given in the program. Please show your badge, which is your coffee ticket. Coffee is served in the exhibition area in the Park Hall.

**Conference rooms** Keynote lectures are held in the Small Auditorium. Other sessions are held in Studio and Rondo. Please follow the electric Tampere Hall signs. A map of the conference venue/rooms is available at the registration desk.

**Currency exchange** Forex Tampere Branch, at Rautatienkatu 14 b is open Mon-Fri 8.30–19, at Stockmann's Department Store (2nd floor) Hämeenkatu 4, Mon-Fri 9.00–20, Sat 9–18, Sun 12–18.

**Lunch** is served in the Park Hall during the hours stated in the program. Please show your delegate badge, which is your lunch ticket.

**Café Soolo** on level 1 is open on Sunday 15.00–18.30, Monday 9.00–18.00 Tuesday-Wednesday 8.30–18.00. Coffee, refreshments, snacks, wine & beer are available. Smoking is allowed in the Café's outdoor terrace.

WiFi There is a free WiFi in Tampere Hall: network: Tampere Hall, password: customer 2012

**First Aid and Pharmacy** There is a first aid room in Tampere Hall for urgent situations. If you need help, please contact any of the conference assistants or Tampere Hall personnel. In case you need a doctor consult the registration desk to contact local health care services or hospitals. The nearest pharmacy (in Finnish 'APTEEKKI') is located at Tullintori Shopping Mall (2nd floor), only a few minute walk from Tampere Hall. Open Mon-Fri at 8.00–18.00, Saturday 10.00–14.00. Yliopiston Apteekki -pharmacy at Hämeenkatu 16 is open every day 7–24.

**How to get to Tampere-Pirkkala Airport?** Tampere-Pirkkala Airport is situated 15 kms from Tampere city centre. The Bus line # 1L runs between the city center (for example Railway Station and the Airport). Timetables: http://aikataulut.tampere.fi/?lang=en

You can also call for an Airport Taxi. The one-way fare is 19 €/person. You need to book the Airport Taxi well in advance. Make sure you book the ride from city center to the airport in good time and while booking, state the departure time of your flight. The dispatcher will tell you the pick-up time. To call an airport taxi dial 0100 4131 (+358 100 4131). The cost of a normal taxi from the city center to the airport will be about 35-45 €.

**Taxi** There are several taxi points around Tampere, one just near the entrance of Tampere Hall. To call a taxi dial 0100 4131 (+358 100 4131). We recommend making a prebooking for an early morning pick-up. The prebooking must be made at least 60 minutes prior to the pick-up. For an advance booking, the customer is charged an extra fee of 7.10 €.

**ATM Cash points** The nearest cash point to Tampere Hall is situated in Tullintori shopping mall.

**Luggage store** at Tampere Hall is in the cloakroom in the main entrance hall. There are also luggage lockers operated with a  $1 \in$  deposit in the main entrance hall.

**Mobile phones** must be switched off during sessions.

**Photocopying service** is available at Tampere Hall at your own cost. For details and prices contact the registration and info desk.

**Shopping** Department stores are open Mon-Fri 9-21, Sat 9-18, Sun 12-21. Shops at Koskikeskus shopping mall are open Mon-Fri 10-19, Sat 10-17, Sun 12-17 (not all shops).

**Smoking** is prohibited inside Tampere Hall. Ashtrays are located outdoors, for example, in front of Café Soolo and Park Hall.

**Toilets** There are toilets on the ground, 1st and 2nd floors of the Tampere Hall's Main Building. There is a disabled toilet on the first floor beside the Cloakroom. There is a baby care room on the ground floor.

## **Tourist Information – Visit Tampere**

Hämeenkatu 14 B
Mon-Fri 10.00-18.00, Sat-Sun 10-15
Tel. 03 5656 6800

## **EXHIBITORS' COMPANY PROFILES**

## Aerosol Devices Inc. Fort Collins, CO, USA

info@aerosoldevices.com http://aerosoldevices.com

Aerosol Devices Inc. revolutionizing the science of collecting airborne particle samples for chemical and biological analysis.

Product: The SPOT SAMPLER™ is a fully-integrated aerosol instrument for the efficient, concentrated collection of nanometer and micrometer-sized particles. Collection may be either wet or dry. Sequential aerosol samples may be collected as dry, I-mm diameter "spots" within the individual wells of a multi-well plate. Alternatively, particles can be collected as a concentrated suspension in a small, liquid-filled vial. These Spot Samples are 'ready to analyze', without user extraction or manipulation. The inherent pre-concentration of the collection method saves labor, improves analysis sensitivity and enhances data quality. Its enabling technology is a moderated condensational growth that enlarges particles into water droplets without temperature extremes or steam. Once grown particles that were as small as a few nanometers are easily captured by gentle impaction. This approach excels at collecting challenging materials such as nanoparticles, bioaerosols, and semi-volatile particles where other collection methods fail.

**About Us:** Aerosol Devices Inc. was founded in 2014 by two professional women in aerosol science: Ms. Pat Keady and Dr. Susanne Hering. The core patented technology is exclusively licensed from Aerosol Dynamics Inc. (Berkeley, California).

## Airmodus Oy Helsinki, Finland

AIRMODUS

sales@airmodus.com

Airmodus technologies are filling the gap between aerosol particle size distribution measurements and gas phase monitoring. Nucleation researchers can observe clusters of molecules and the nucleated particles when they are as small as I nm. And, further learn about the growth of the particles using the activation spectra of I-3 nm particles.

Airmodus offers Particle Size Magnifier systems that allow you to detect particles as small as I nm in diameter; easy to use Condensation Particle Counters with a cut-off size fit for your measurement needs; and special mass spectrometer inlets for the detection of challenging gaseous compounds (e.g. sulfuric acid, ammonia, amines).

## Cambustion Cambridge, United Kingdom

sales@cambustion.com www.cambustion.com/aerosol

Established in Cambridge, UK in 1987, Cambustion designs and manufactures aerosol instrumentation and gas analysers.

The Centrifugal Particle Mass Analyser (CPMA) classifies aerosol particles by their mass to charge ratio using opposing centrifugal and electrical forces. It is a standalone bench-top analyser with built-in touch-screen, fixed-resolution scanning, and is capable of directly interfacing with a wide range of detectors. Applications include particle density determination, and traceable calibration of mass-based analysers, e.g. those used for black carbon measurement.

Cambustion produces a unipolar diffusion charger (the UDAC), capable of placing a high level of charge on aerosols. Combining a UDAC, a CPMA and an aerosol electrometer forms an aerosol mass concentration standard.

The DMS500 Mkll offers the fastest real-time electrical-mobility size/number spectra available. It couples both a fast data rate of 10Hz with a fast response time of just 200 ms to resolve a change in particle concentration of 10–90 %, which no other mobility analyser can match. It has a wide size range from  $5\,\text{nm}-1.0\,\mu\text{m}/2.5\,\mu\text{m}$ , with unrivalled sensitivity. With fully integrated sampling and dilution, the DMS is used for both ambient applications and direct sampling of high concentration aerosol sources.

We continue to innovate; sponsoring aerosol research and the annual Cambridge Particle Meeting, while our large R&D team undertakes collaborative projects with researchers from around the world.

## Dekati Ltd. Kangasala, Finland

sales@dekati.fi www.dekati.com

Dekati Ltd. has provided high quality instrumentation for fine particle measurements successfully for over 20 years. Our measurement solutions include complete fine particle measurement setups including both sample conditioning and particle detection for <10µm particles. All Dekati® instruments are developed, manufactured and calibrated in Finland with strict quality requirements and provided with a standard two year warranty. Dekati® Instruments are used for example in the following application areas:

- Combustion Process Emission Measurements
- Environmental Ambient Aerosol Research and Monitoring
- Occupational Health and Safety Measurements
- Pharmaceutical Drug Screening and Inhalator R&D
- · Nanotechnology and Material Processing

The highlights of our product line include the ELPI+™ product family that enables real-time measurement of particle size distribution 6nm-10µm and post-measurement chemical analysis of the size classified, collected samples. The High Temperature version of the ELPI+™ additionally allows direct measurement of up to 180°C aerosol sample without the need to cool the sample. The latest addition to the ELPI+™ product family is the High Resolution ELPI+™ that gives particle size distribution in up to 500 size classes making it a superior tool for detailed particle size distribution analysis. In addition to the ELPI+™ instruments, Dekati® Product Line includes several other instruments for both particle detection and aerosol sample conditioning and dilution.

## Magee Scientific Berkeley, California, USA

sales@aerosol.si www.mageescientific.com

## Manufacturing facilities:

Aerosol d.o.o Kamniska 41, SI-1000 Ljubljana, Slovenia www.aerosol.eu

Magee Scientific Aethalometer®, instrument for measurement of Black Carbon, is manufactured at "Aerosol d.o.o." in Ljubljana, Slovenia. The Aethalometer® provide an on-line measurement of aerosol absorption on up to 7 wavelengths: 370, 470, 520, 590, 660, 880, 950 nm. Black Carbon is the second most important climate forcer and highly correlated with detrimental health effects of air pollution. Measurements by the Aethalometer® of aerosol absorption at different wavelengths of light provide information specific to sources and enable discrimination between biomass and fossil fuel combustion aerosols by ambient measurements, and detection of mineral.

The'Next Generation' Aethalometer®, Model AE33, incorporates scientific and technical advances designed to offer improved measurement performance, user features, communications and interface, and the ability to perform routine performance tests to verify correct operation. Most importantly, the new instrument incorporates the patented DualSpot™ measurement method. This provides two significant advantages: elimination of the changes in response due to 'aerosol loading' effects; and a real-time calculation of the 'loading compensation' parameter, which offers insights into aerosol optical properties.

## naneos particle solutions gmbh Windisch, Switzerland

info@naneos.ch www.naneos.ch

We are a spin-off company of the institute for aerosol and sensor technology of the university of applied sciences northwestern Switzerland, and build on a decade of experience in nanoparticle instrumentation development. Our philosophy is to keep things simple - in engineering, simple automatically means robust. We strive to build instruments that are simpler to use and need less maintenance than traditional nanoparticle detectors. Beside our standard aerosol dosimeter called partector, we also have a new product, the partectorTEM which is an ultra-portable nanoparticle surface area dosimeter with integrated TEM sampling for work-place and exposure monitoring. It is also suitable for environmental monitoring or airborne measurements. For more information visit our website www.naneos.ch

## Sympatec GmbH - System | Partikel | Technik Clausthal-Zellerfeld, Germany

sales@sympatec.com www.sympatec.com

Sympatec develops, manufactures, sells, services and supports an innovative range of best instruments for particle size and shape analysis in laboratory and process for customers worldwide.

With continuous innovations in the technological fields of laser diffraction, dynamic image analysis, ultrasonic extinction and photon cross-correlation spectroscopy (PCCS), Sympatec makes a prominent contribution to the development, production and quality control of most challenging particulate systems.

Typical applications cover dry powders and granules, fibres, suspensions, emulsions, gels, sprays and inhalants within a size range from 0.5 nm to 34,000  $\mu$ m. Modular instruments show great versatility and can be adapted to the specific task within your laboratory. The proven measurement technologies are also available for integration into your process. Moreover, all instruments reliably deliver most accurate, reproducible and comparable results at shortest measuring times.

Sympatec – The Particle People.

## TSI GmbH Aachen, Germany

tsigmbh@tsi.com www.tsi.com

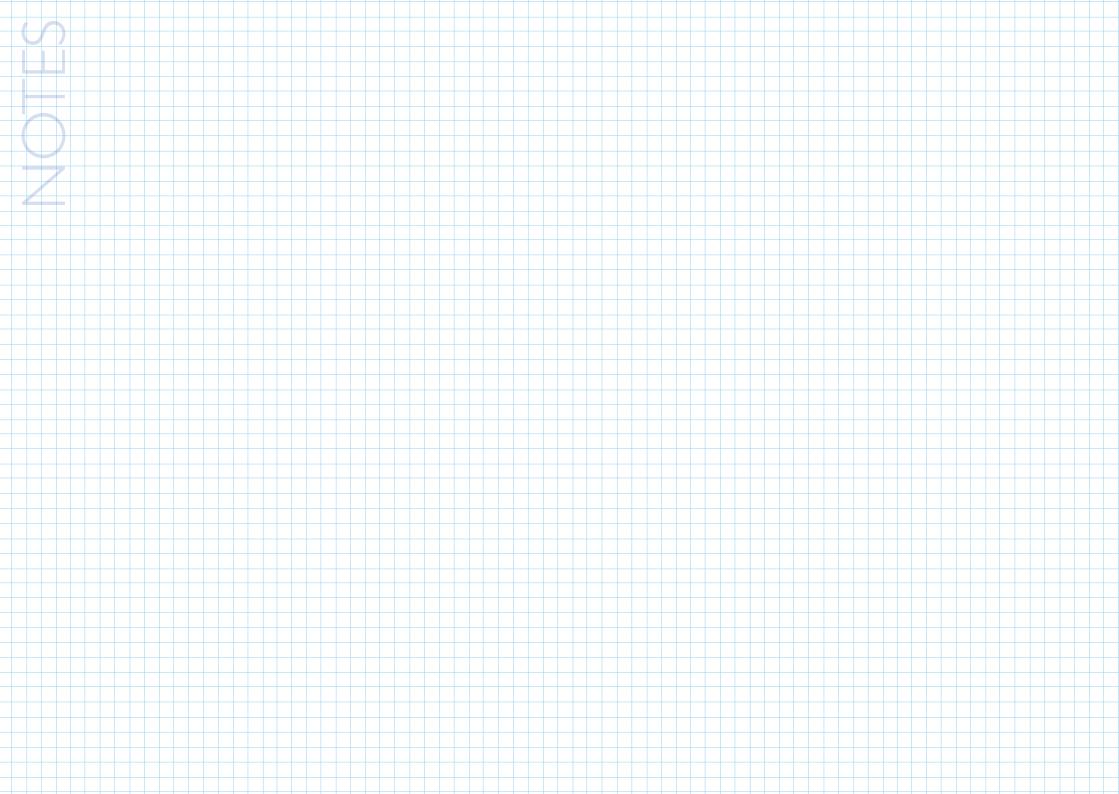

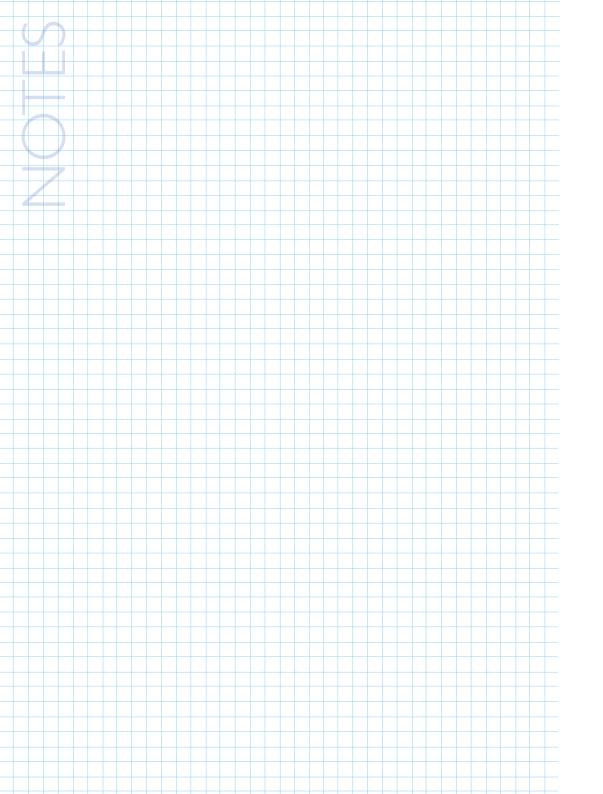

During Aerosol Technology 2015 Conference, the TSI Team, together with its Channel Partner Teknocalor, will present:

- The new Electrospray Aerosol Generator with Soft-X-Ray neutralizer which generates high concentrations of particles in the 2 to >150 nm size range.
   A combination with the SMPS allows sizing of nanoparticles or macro-molecules.
- The recently introduced "Nanoparticle Emission Tester (NPET)", a portable, easy to use, cost effective instrument dedicated to engine exhaust and combustion emissions.

Stop by at our booth and learn more about our products!
