

## **2021 International Conference on Localization and GNSS (ICL-GNSS) WiP Proceedings**

Welcome to the 11th International Conference on Navigation and GNSS to consider and discuss reliable navigation, ranging and positioning in indoor and outdoor, vehicular applications, wireless networks, wearables and consumer products.

Navigation and positioning are becoming essential when guaranteeing transparent, efficient and reliable workflows. A robust localization solution, which will be available continuously is needed regardless outdoor and indoor, and on different platforms. ICL-GNSS addresses the latest research on wireless and satellite-based positioning and ranging techniques to provide reliable and accurate position information with low latency. During the three conference days we will have an intensive look to GNSS technologies and applications, as well as an outlook to various wireless technologies as enabler for precise and real-time localization.

In the special circumstances of the COVID-19 pandemic affecting our life and work, we are still able to meet each other in the virtual world. Stay safe and enjoy this opportunity. We wish you a fruitful conference and hope to meet you live next year again!
