

Title of the abstract	Presenter	Research group leader	Category	Session	Poster number
Serum IgG antibodies to HPV6 L1, E2, E4, E6 and E7 proteins among children prospectively followed-up for three years	Helmi Suominen	Karolina Louvanto	Clinical session	2	116
The quality of life of frequently vs. infrequently screened HPV vaccinated women	Kaisa Taavela	Karolina Louvanto	Clinical session	2	118
HPV vaccinations' association to pregnancy and childbirth prevalence	Tiina Koivisto	Karolina Louvanto	Clinical session	2	129
Vasculature, Innervation, and Collagen of the Cardiac Conduction System: a Morphometrical Study	Denis Depes / Ivana Kholová	Timo Paavonen	Clinical session	2	130
Autonomic Nerves, Vein of Marshall, and Cardiovascular Mortality	Denis Depes / Ivana Kholová	Timo Paavonen	Clinical session	2	131
Relation of changes in PEF and FEV1 in exercise challenge in children	Leon Csonka	Lauri Lehtimäki	Clinical session	2	132
Prolonged persistent genital HPV infections and the future risk of cervical carcinogenesis	Eero Numminen	Karolina Louvanto	Clinical session	2	133
Prevalence, patient perceptions and significance of no-biopsy diagnosis of celiac disease in adults	Hanna Sareila	Kalle Kurppa	Clinical session	2	134
Modelling the interplay between prostate cancer cells and immune cells	Mahmudul Hasan Tanvir	Alfonso Urbanucci	Clinical session	2	135
Effect of extract cellular calcium microenvironment in the formation of GBM spheroid	Puja Sarkar	Meenakshisundaram Kandhavelu	Cancer	1	42
Developing vascularized bone tissue on-a-chip for assessing prostate cancer cell extravasation	Harini Wickramaarachchi	Susanna Miettinen	Cancer	1	29
Modelling the interplay between prostate cancer cells and immune cells	Mahmudul Hasan Tanvir	Alfonso Urbanucci	Cancer	2	30
Spatially resolved transcriptomics points to distinct cell interactions within primary and castration-resistant prostate cancer	Antti Kiviaho	Matti Nykter	Cancer	2	32
The role of non-coding RNAs in the progression of IDH-mutant astrocytomas to grade 4	Anja Hartewig	Kirsi Rautajoki	Cancer	1	31
Genomic characterization of IDH-mutant astrocytoma progression to grade 4 in the treatment setting	Kirsi Rautajoki	Kirsi Rautajoki	Cancer	1	33
Effect of hypoxia on myeloid immune cells and immunosuppression in diffuse astrocytoma tumors	Aliisa Tiihonen	Kirsi Rautajoki	Cancer	1	35
Cancer origin tracing and timing in two high risk prostate cancers using multisample whole genome analysis: potential clinical value	Jenni Kesäniemi	Steve Bova	Cancer	1	37
Designing the workflow for a multicentre randomized controlled trial for metastatic colorectal cancer	Emmi Hämäläinen	Toni Seppälä	Cancer	1	39
Instant carcinoma? Examining the possibility of a 2-in-1 hit initiating event in the MLH1 deficient Lynch syndrome tumors using whole-exome sequencing.	Kalle Eevert Hokkanen	Toni Seppälä	Cancer	2	34
Oral microbial transcriptome profiles in OSCCs and the effect of oncogenic HPVs	Suvi Rintala	Karolina Louvanto	Cancer	1	41
Modelling the prostate tumor microenvironment and its involvement in shaping metastatic potential	Karishma Sajjani	Alfonso Urbanucci	Cancer	1	56
Genetic features driving the development of both epithelioid GB and PLNTY in one patient: A case report	Sonja Mäntylä	Kirsi Rautajoki	Cancer	2	36
Correlates between androgen receptor activation and chromosome accessibility in nonmalignant and malignant prostate epithelial cells.	Konsta Kukkonen	Tapio Visakorpi	Cancer	2	38
FGFR3-TACC3 fusion protein drives cell migration, lower differentiation state, and aberrant calcium signaling response in glioblastoma	Laura Huhtala	Kirsi Rautajoki	Cancer	2	40
Genomic determinants of therapy response in ETV6::RUNX1 leukemia	Laura OKSA	Olli Lohi	Cancer	2	55
Utilizing DBIT-seq technology in prostate cancer spatial omics	Jari Väliäho	Matti Nykter, Pasi Kallio	Cancer	2	60

Analysis of colorectal cancer microenvironment in the FinCRC cohort	Iida Salonen	Kirsi Rautajoki	Cancer	2	62
Alkylaminophenols: a novel third-generation EGFR inhibitor	Shabnaz Koochakkhani	Meenakshisundaram Kandhavelu	Cancer	1	61
Rhythmic regulation of photoreceptor outer segment phagocytosis by RPE in zebrafish retina	Jenni Partinen	Soile Nymark	Molecular and cellular physiology and biology	2	1
SRSF3 shapes the structure and processing of miR-17-92 cluster	Erika Aikio	Minna-Liisa Änkö	Molecular and cellular physiology and biology	1	2
Reduced currents and altered localization of calcium channel CaV1.3 in retinal pigment epithelium derived from patients with age-related macular degeneration	Viivi Karema-Jokinen	Soile Nymark	Molecular and cellular physiology and biology	2	5
Resilient and sensitive human genes – what is behind it?	Lena Möbus	Dario Greco	Molecular and cellular physiology and biology	1	6
Integrated Omics Analysis Reveals Insights into Celiac Disease Pathogenesis	Valeriia Dotsenko	Keijo Viiri	Molecular and cellular physiology and biology	2	7
Monitoring transcription programs in bacteria with synthetic probes	Suchintak Dash	Andre S. Ribeiro	Molecular and cellular physiology and biology	1	8
Transcription dynamics in bacterial operons during genome-wide stresses.	Rahul Jagadeesan	Andre Sanches Ribeiro	Molecular and cellular physiology and biology	2	9
The role of nhlrc2 during the early development	Maiju Junno	Mika Rämetsä	Molecular and cellular physiology and biology	1	10
Toxicological Screening of Less-Studied Per- and Polyfluoroalkyl Substances (PFAS)	Laura Ylä-Outinen	Dario Greco	Molecular and cellular physiology and biology	2	11
In vivo imaging approach to study photoreceptor and retinal pigment epithelium cells in zebrafish	Nevala, Noora Emilia	Soile Nymark	Molecular and cellular physiology and biology	1	12
High Mobility Group A1 (HMGA1) is a non-canonical RNA-binding protein with regulatory functions in pluripotent stem cells	Mauro Scaravilli	Minna-Liisa Änkö	Molecular and cellular physiology and biology	2	13
The role of RNA-binding proteins in platelet biogenesis	Piia Takabe	Minna-Liisa Änkö	Molecular and cellular physiology and biology	1	14
Context-specific interactomics through targeted covalent conjugation of BirA* revealed the possible association of tensin3 with talin	Muktesh Athale	Vesa P. Hytönen	Molecular and cellular physiology and biology	2	15
Fibroblasts derived from cold-adapted hare species, Lepus timidus, present distinct metabolic signature associated with adaptive thermogenesis	Sina Saari	Eric Dufour	Mitochondrial research	1	16
Natural variation of mitochondrial genome alters innate immune responses	Laura Vesala	Tiina S. Salminen	Mitochondrial research	2	63
Between benefit and harm – the effect of antibiotics-induced mitochondrial dysfunction on innate immune responses	Tilman Tietz	Tiina S. Salminen	Mitochondrial research	1	64
The influence of EBV antibody levels on oral and genital HPV infection outcome among women	Sanni Rinne	Karolina Louvanto	Immunology and virology	1	4
Spatial Transcriptomics of Celiac Disease in different stages of inflammation	Emilia Siukola	Katri Kaukinen	Immunology and virology	2	3
High throughput multiplex assays for establishing pathogen-disease linkage in cohort studies	Niila Jouppila	Heikki Hyöty	Immunology and virology	1	18
Meteorin-like protein is a novel factor and potential drug target in osteoarthritis	Katriina Vuolteenaho	Eeva Moilanen	Immunology and virology	2	17
Investigating the interaction of the immune system with metabolism and the central nervous system in the Drosophila model	Matthew K. Maasdorp	Mika Rämetsä	Immunology and virology	1	20

SpyTag/SpyCatcher display of influenza M2e peptide on norovirus-like particle provides stronger immunization than direct genetic fusion	Vili Lampinen	Minna Hankaniemi	Immunology and virology	2	19
Effects of gluten consumption on the transcriptomic landscape of Dermatitis Herpetiformis	Helka Kaunisto	Katri Lindfors	Immunology and virology	1	22
Ubiquitin-conjugating E2-enzyme Effete controls hemocyte activation in <i>Drosophila melanogaster</i>	Susanna Valanne	Mika Rämetsä	Immunology and virology	2	21
MKP-1 as a novel anti-inflammatory drug target: cAMP enhancing drugs salbutamol and rolipram promote alternative macrophage activation through MKP-1	Tiina Lehtola	Eeva Moilanen	Immunology and virology	1	24
Neutrophils in dermatitis herpetiformis and celiac disease	Olga Albó	Katri Lindfors	Immunology and virology	2	23
Effects of Black Crowberry (<i>Empetrum nigrum</i> subsp. hermaphroditum) supplementation on metabolic and inflammatory adverse effects induced by high-fat diet in a mouse model of obesity	Anni Alatalo	Eeva Moilanen	Immunology and virology	1	26
Transient receptor potential (TRP) channel expression in human osteoarthritic chondrocytes —TRPA1 and TRPM8 as potential drug targets	Leevi Halonen	Eeva Moilanen	Immunology and virology	2	25
Antiviral therapy as a possible treatment for type 1 diabetes	Amirbabak Sioofy Khojine	Heikki Hyöty	Immunology and virology	1	28
Structure–function informed design of virus-like particle-based rhinovirus vaccine	Minne Jartti	Minna Hankaniemi	Immunology and virology	2	27
Hexavalent coronavirus vaccine elicits both humoral and cellular immune responses in mice	Stina Gröhn	Minna Hankaniemi	Immunology and virology	2	58
Genes affecting mycobacterial infection in zebrafish	Sanna-Kaisa Harjula	Mika Rämetsä	Immunology and virology	1	57
Extracellular Glycosyltransferase EpsH is Involved in eDNA Accumulation and Antibiotic Sensitivity in Mycobacterial Biofilm	Alina Sillanpää	Mataleena Parikka	Immunology and virology	1	59
Role of Transglutaminase 2 in Enterovirus-infected human intestinal organoids and spatial transcriptomic assessment of mucosal damage in celiac disease	Hana Hien Le	Keijo Viiri	Gastroenterology	1	125
Development of non-alcoholic fatty liver is associated with altered DNA methylation profile in blood – A longitudinal multiomic study	Emma Raitoharju	Emma Raitoharju	Gastroenterology	2	126
Circulatory hsa-miR-339-5p is associated with later development of non-alcoholic fatty liver disease in the prospective Young Finns Study	Daria Kostiniuk	Emma Raitoharju	Gastroenterology	1	127
Musculoskeletal symptoms are frequent among celiac disease patients on gluten-free diet	Saara Tillqvist	Katri Kaukinen	Gastroenterology	2	128
PhD Thesis: Social and Economic Impact of Glaucoma and Glaucoma Care in Ageing Population	Petri Purola	Hannu Uusitalo	Other fields of medicine	1	117
Risk factors associated with IgG seropersistence to <i>C. trachomatis</i> and <i>M. genitalium</i> among heterosexual couples	Nea Koskela	Karolina Louvanto	Other fields of medicine	2	120
Do epigenetic clocks predict future health outcomes in a middle-aged population, and how do they compare to traditional risk factors of cardiometabolic diseases?	Saara Marttila	Emma Raitoharju	Other fields of medicine	1	119
Prevalence, temporal trends and associated factors of impaired glucose tolerance and type 2 diabetes in Finnish children and adolescents	Hanna Riekkö	Kalle Kurppa	Other fields of medicine	2	122
Clustering of acute leukemia in Finland: a nationwide register-based case-control study	Julia Ventelä	Atte Nikkilä	Other fields of medicine	1	121
Insufficient EBUS-TBNA specimens. The analysis of criteria and reasons behind the insufficient specimens.	Antti Vuorisalo	Ivana Kholova	Other fields of medicine	2	124
The Milan System Atypia of Undetermined Significance: 5-year performance data	Henri Lagerstam	Ivana Kholová	Other fields of medicine	1	123
Bacteria-targeting virus-like particle vaccine in prevention of cardiovascular diseases	Jonna Alkula	Vesa Hytönen	Cardiovascular diseases	1	103

Systematic and morphological assessment of the ascending aorta undergoing surgery for dissection and dilation: Application of Society for Cardiovascular Pathology and the Association for European Cardiovascular Pathology consensus statement in the tertiary care hospital in Finland	Trina Chen	Timo Paavonen	Cardiovascular diseases	2	93
Cardiac Ischemia On-a-Chip: The Effects of Levosimendan and Levosimendan Metabolite OR-1896 on Ischemic Human-Induced Pluripotent Stem Cell-Derived Cardiomyocytes	Kaisla Walls	Katriina Aalto-Setälä	Cardiovascular diseases	1	95
Explainable AI analysis of a prediction model for detecting premature atrial and ventricular complexes	Pedro A. Moreno-Sánchez	Mark van Gils	Cardiovascular diseases	2	94
Development of an explainable AI prediction model for ECG-based arrhythmia detection	Pedro A. Moreno-Sánchez	Mark van Gils	Cardiovascular diseases	1	96
Seizures-on-chip to model human epilepsies	Satu Jäntti	Susanna Narkilahti	Neurology and neuroscience	2	104
Drug Repurposing for Glioblastoma: Targeting GPR17 signaling for finding therapeutic opportunities	Sana Kari	Meenakshisundarum Kandhavelu	Neurology and neuroscience	1	105
Assessment of microglia phenotype in multiple sclerosis using patient-derived induced pluripotent stem cells	Tanja Hyvärinen	Sanna Hagman	Neurology and neuroscience	2	106
Development of a in vitro model for Dravet syndrome using patient hiPSC-derived cortical neurons	Ropafadzo Mzezewa	Susanna Narkilahti	Neurology and neuroscience	1	107
Functional characterization of human peripheral neurons and applications in target tissue innervation	Susanna Harju & Susanna Kaksonen	Susanna Narkilahti	Neurology and neuroscience	2	108
Constructing and optimizing morphologically detailed cerebellar astroglial cell model with Blender-based toolkit CellRemorph	Laura Keto	Marja-Leena Linne	Neurology and neuroscience	2	110
Analysis of network-level properties in brain models with neuron-astrocyte interactions	Marja-Leena Linne	Marja-Leena Linne	Neurology and neuroscience	1	109
Developing Astrocytic Glutamate Uptake Model for Neuron-Astrocyte Synapse	Saana Seppälä	Marja-Leena Linne	Neurology and neuroscience	1	111
Establishing and assessing temporal interference electrical stimulation in neuronal cultures in vitro.	Annika Ahtiainen	Jari Hyttinen	Neurology and neuroscience	2	112
Common dementia-associated neuropathology in the Tampere Sudden Death Study	Eloise Mikkonen	Liisa Myllykangas	Neurology and neuroscience	1	113
Exploring Kainic Acid-induced Alternations in Tripartite Circuit Networks	Andrey Vinogradov	Susanna Narkilahti	Neurology and neuroscience	2	114
Integrating wet-lab data, computational models and tools in EBRAINS digital neuroscience platform for better understanding of the human brain	Marja-Leena Linne	Marja-Leena Linne	Neurology and neuroscience	1	115
A novel, xeno-/serum free culturing setup for vascularized, engineered muscle bundles	Ella Lampela	Susanna Miettinen	Cell and tissue engineering	1	86
Ascorbic acid 2-phosphate embedded poly(L-lactide-co-ε-caprolactone) membranes for treating pelvic organ prolapse	Alma Kurki	Susanna Miettinen	Cell and tissue engineering	2	85
3D bioprinted human stem cell derived cornea stromal tissue model with innervation	Laura Honkamäki	Susanna Narkilahti	Cell and tissue engineering	1	84
Corneal epithelial commitment during early differentiation of induced pluripotent stem cells	Sonja Harjuntausta	Heli Skottman	Cell and tissue engineering	2	83
Cellular co-culture rather than 3D environment improves cardiomyocyte functionality in gellan gum-gelatin hydrogel	Joona Valtonen	Katriina Aalto-Setälä	Cell and tissue engineering	1	74
Human iPSC glial co-culture chip model for studying neuroinflammation in vitro	Iisa Tujula	Sanna Hagman	Cell and tissue engineering	2	75
Towards Blood-Brain Barrier-on-Chip with patient-derived cells to study vascular defects in multiple sclerosis	Johanna Laakkonen	Susanna Miettinen	Cell and tissue engineering	1	76
Uptake of clinically relevant human platelet secreted extracellular vesicles into human induced pluripotent stem cell derived neurons in hypoxic conditions	Venla Harju	Susanna Narkilahti	Cell and tissue engineering	2	77

Liver-on-a-chip: Development of a 3D liver model utilizing iPSCs and novel microfluidic chip devices	Siiri Suominen	Katriina Aalto-Setälä	Cell and tissue engineering	1	78
Barrier-free, open-top microfluidic chip for generating two distinct 3D microvasculatures	Alma Yrjänäinen	Susanna Miettinen	Cell and tissue engineering	2	79
iPSC Core Facility – Tampere University	Henna Lappi	Katriina Aalto-Setälä	Cell and tissue engineering	1	80
Stroke-Heart syndrome on a chip	Elias Kuusela, Neea Pohjamo	Katriina Aalto-Setälä, Susanna Narkilahti	Cell and tissue engineering	2	81
Effects of Bariatric Surgery Related Weight-Loss on Adipose Stromal Cell Characteristics, Metabolism, and Immunomodulation Capacity in a Follow-Up Study	Amna Adnan	Susanna Miettinen	Cell and tissue engineering	1	82
In-vitro and in-vivo evaluation of a silicate (1393) and borosilicate (13-93B20) robocasted bioactive glass scaffolds	Agata Szczodra	Jonathan Massera	Biomaterials	1	102
Microrheology as a versatile characterization method for 3D hydrogel cell cultures	Janne T. Koivisto	Minna Kellomäki	Biomaterials	1	92
Microgels for body on chip applications	Christine Gering	Minna Kellomäki	Biomaterials	2	91
Hydrogel screening for 3D vascularization model on-chip	Kati Rinnekari	Susanna Miettinen & Minna Kellomäki	Biomaterials	1	90
In vitro analysis of matrix-filler interactions in Gellan Gum/Bioactive Glass hydrogels	Anastasiia Yiannacou	Minna Kellomäki, Jonathan Massera	Biomaterials	2	89
Chip development for hydrogel characterization	Mart Kroon	Minna Kellomäki	Biomaterials	1	88
Performance of label-free biosensors as a function of layer thickness	Juha Määttä	Vesa Hytönen	Biomaterials	2	87
Novel X-ray microtomography imaging method for 3D visualization of prostate architecture	Santiago Laguna-Castro	Jari Hyttinen	Bioimaging	1	54
Validation of the X-ray microtomography in the small intestine biopsy analysis	Markus Hannula	Jari Hyttinen	Bioimaging	2	53
Estimation of fertility potential of cryopreserved ovarian tissue before cancer treatments using micro-CT imaging and machine learning	Mai Nguyen	Jari Hyttinen	Bioimaging	1	52
Exploring 3D histology data in virtual reality	Kaisa Liimatainen	Pekka Ruusuvoori	Bioimaging	2	51
Development of 3D in vitro microelectrode arrays for 3D cell models	Tomi Rynnänen	Pasi Kallio	Sensing and actuation devices, micro- and nanoengineering	2	65
Assessment of Transplant Organ Quality – OrganAnalytics R2B Project	Annika Ahtiainen	Jari Hyttinen	Sensing and actuation devices, micro- and nanoengineering	1	66
Implementations for Data Acquisition and Analysis in a Dopamine Sensing Brain Implant: a Review	Wiljami Ventilä	Leena Ukkonen	Sensing and actuation devices, micro- and nanoengineering	2	67
Acoustic Manipulation of Particles in Microfluidic Chips with an Adaptive Controller that Models Acoustic Fields	Kyriacos Yiannacou	Veikko Sariola	Sensing and actuation devices, micro- and nanoengineering	1	68
Calcium carbonate theranostic agent in an ultrasound field	Nicole Anderton	Michiel Postema	Sensing and actuation devices, micro- and nanoengineering	1	70
Quantifying the dynamic hydrophobicity of carbon black tattoo ink due to ultrasound	Craig S. Carlson	Michiel Postema	Sensing and actuation devices, micro- and nanoengineering	1	72

Wireless Carbon-based Electrochemical Dopamine Sensor Brain Implant	Stefanus Wirdatmadja	Leena Ukkonen	Sensing and actuation devices, micro- and nanoengineering	2	69
Microfluidic Perfusion Chip for Hypoxia Studies	Karim Ameziane	Pasi Kallio	Sensing and actuation devices, micro- and nanoengineering	2	71
Simulation of a rotating impeller	Mari Niemelä	Minna Kellomäki	Sensing and actuation devices, micro- and nanoengineering	1	73
Mechanotransduction in the presence of R403Q hypertrophic cardiomyopathy: a computational study on Piezo1	Amin Forouzandehmehr	Jari Hyttinen	Computational biology	1	50
Improving Genomic Variant Detection Efficiency: Insights From Alignment and Variant Caller Comparisons	Karoliina Salenius	Matti Nykter	Computational biology	2	49
Exploring the Role of Innate Immune Memory in Macrophages	Giorgia Migliaccio	Dario Greco	Computational biology	1	48
Characterizing bacterial genes with bimodal protein levels	Ines S. C. Baptista	Andre S. Ribeiro	Computational biology	2	47
How vinculin mutant binds vinculin binding sites in talin	Vasyl V. Mykuliak	Vesa Hytönen	Computational biology	1	46
Toxicogenomics data for chemical safety assessment: from intrinsic characteristics to translational potential	Laura A. Saarimäki	Dario Greco	Computational biology	2	45
Theoretical considerations of unsupervised learning with spike-time-dependent-plasticity and winner-take-all circuits	Iiro Ahokainen	Marja-Leena Linne	Computational biology	1	44
Graph learning for toxicology and chemical safety assessment	Angela Serra	Dario Greco	Computational biology	2	43
Prediction of patient flow in the emergency department using explainable AI	Matti Aalto	Mark van Gils	Health data science	2	97
The effect of differentially methylated loci between Eastern and Western Finns on gene expression and phenotype	Joanna Ciantar	Emma Raitoharju	Health data science	2	99
Predictive modelling and exploratory data analysis in the ICU during COVID-19	Antti Kallonen	Mark van Gils	Health data science	1	98
From Molecules to Mechanisms: An Interactive Tool for Knowledge Discovery	Michele Fratello	Dario Greco	Health data science	2	101
Integrative Approaches in Drug Repositioning for Lung Fibrosis: AI and Data Analysis	Zeyad Al-Abdulraheem	Dario Greco	Health data science	1	100
